State Performance Indicator Pilot

SM52526

Congressional District: NY-21

**FY 99 Funding:** \$100,000

Project Period: 9/30/98 - 8/31/01

The New York State Office of Mental Health (OMH) has made substantial progress in the past three years in implementing performance management approaches for the monitoring of publicly funded mental health services. Considerable performance management infrastructure and experience in the collection, analysis, reporting, and use of performance data has been a result of various initiatives including establishing a Bureau of Performance and Outcomes Management, designing a performance management system for inpatient services, and designing performance management systems for Medicaid mental health Special Needs Plans for adults and children. In the proposed project, the Five State Feasibility Study performance indicators will be pilot tested in the inpatient and outpatient systems, new mechanisms for systematically collecting and reporting outcome data will be tested, cultural competency indicators will be piloted, and methodologies in risk adjustment will be refined and applied to improve the sensitivity and usefulness of data for decision making by administrators, providers, and recipients of care.

*Mental Health Assn in New York*

Albany, NY

Consumer Networking

SM52612

Congressional District: NY-21

**FY 99 Funding:** \$60,000

Project Period: 9/30/98 - 8/31/01

The project will be developed through the creation of a Consumer Affairs Board of the Board of Directors of the Mental Health Association in New York State, Inc (MHANYS). With project staff, MHANYS administration, and enhancement of some of the existing programs, the project will develop and evaluate a range of activities. The Consumer Affairs Board will be of broad representation, embracing diversity and providing for consumer leadership in all phases of the project. The project will include such activities in year one as technical assistance; needs assessment; identification of consumer and peer-run publications and organization throughout the State; and development of database and online directory and researched funding/resources to support consumer-run publications available through a toll-free number. In addition, a Consumer Affairs Board would be created with representatives from several Statewide coalitions and networks.

Albany, NY

Conference Grant

SM52882

Congressional District: NY-01

**FY 99 Funding:** \$50,000

Project Period: 5/17/99 - 5/16/00

To convene and disseminate the findings of a "Research to Practice" conference. Goals of the conference are to help attendees translate prevention research into prevention practice and to create workgroups that will evolve consensus toward building partnerships that can bring new prevention practices to the community.

*Research Foundation for Mental Hygiene, Inc.*

Albany, NY

Consumer Networking

SM52504

Congressional District: NY-21

**FY 99 Funding:** \$52,958

Project Period: 9/30/98 - 8/31/01

The purpose of this project is to support the development of a voluntary, statewide Peer Accreditation Association composed of recipient-run mental health programs. The Association will develop standards for accreditation of peer-operated mental health services, assist such organizations in applying for accreditation and in maintaining standards of operation through training and technical support. By the end of the three-year funding period, the Association will incorporate and become a free-standing organization.

*Families Together in New York State, Inc.*

Albany, NY

Children and Family Network

SM52531

Congressional District: NY-21

**FY 99 Funding:** \$60,000

Project Period: 9/30/98 - 8/31/01

This project will increase the capacity of the statewide network to participate in the development of policies, programs, and quality assurance activities related to the mental health of children and adolescents with serious emotional disorders and their families. Families Together of New York State recognizes that a lack of experience with the local political process as well as a need for further development of organizational and leadership skills has been one obstacle to full participation of family members raising children with serious emotional disorders. The target population includes families with children and adolescents with serious emotional disorders and mental health professionals.

HIV/AIDS Outcomes & Costs

SM52393

Congressional District: NY-17

**FY 99 Funding:** \$623,137

Project Period: 9/30/98 - 8/31/03

The Department of Psychiatry and Behavioral Health at Montefiore Medical Center and the Albert Einstein College of Medicine currently operate two integrated methadone treatment and primary care programs, serving more than 4,300 clients, of whom, more than 850 are identified as living with HIV/AIDS. The vast majority are Latino or African American; all have a history of heroin use. This project will study two groups and measure adherence levels, costs of treatment, and health outcomes. First, a Multiple Diagnoses Subgroup Study will assess 225 clients for mental health, substance abuse, and HIV diagnoses and determine the costs, adherence levels, and health outcomes associated with providing treatment. An Intervention Study will target people with Borderline Personality Disorder, which is particularly costly to treat and often goes hand-in-hand with polysubstance abuse, self-destructive behaviors, impulsivity, and angry outbursts. Eligible clients will be randomly assigned to a "Treatment As Usual" control group or to a 1-year Dialectical Behavior Therapy Program for substance users, a cognitive-behavioral program which focuses on maladaptive behaviors, such as treatment nonadherence and use of illicit drugs, and teaches adaptive behaviors and new skills.

Project Period: 9/30/99 - 9/29/00

The William Floyd School District and partnering agencies will utilize 2 exemplary practices to decrease youth alcohol, tobacco, and other drug use. FAST (Families and Schools Together) will target grades 1-3 and grades 6-8, serving over 75 high-risk youths and families. Reconnecting Youth, the second intervention, will be implemented at the high school, serving no fewer than 120 at-risk youth and families

*Columbia University*

New York, NY

AIDS Training

SM52311

Congressional District: NY-15

**FY 99 Funding:** \$228,549

Project Period: 9/30/98 - 8/31/01

Columbia University has been providing HIV-specific training to mental health providers throughout New York, New Jersey, and Connecticut since 1992. The program, which already has reached more than 14,000 providers, targets providers who are unlikely to attend conventional professional training programs, including providers in impoverished urban communities that have some of the highest HIV case rates in the Nation. Over the years, the program has focused on providing training opportunities to front-line paraprofessional and non-traditional providers in rural and suburban areas where HIV infection and AIDS are on the rise, but appropriate training remains difficult to obtain. Columbia's culturally diverse team already has developed seven training modules on facing HIV/AIDS; pre- and post-test counseling; risk- and transmission-reduction interventions; psychiatric, neuropsychiatric, and medical complications of HIV/AIDS; treatment adherence; coping with HIV/AIDS; and legal, ethical, and policy issues. The program initially placed special emphasis on meeting the mental health needs of people with severe mental illness who have high rates of HIV infection but has broadened its focus to meet the increased demand for training. The program already has existing relationships with the American Psychiatric Association, the American Psychological Association, and the National Alliance for the Mentally Ill--all of which assist in curriculum development and dissemination.

HIV/AIDS Outcomes & Costs

SM52403

Congressional District: NY-08

**FY 99 Funding:** \$639,638

Project Period: 9/30/98 - 8/31/03

The project is to develop and assess the effectiveness of an integrated, residential/aftercare therapeutic community program for persons with HIV/AIDS and comorbidity at Gaudenzia's "People With Hope" program in Philadelphia, PA. It is designed to assess differences in treatment adherence, health outcomes, and cost-benefit between the study conditions. This project both extends therapeutic community programming for a comorbid HIV/AIDS population and provides an aftercare program model that can be generalized to the broader drug treatment, mental health, and HIV/AIDS treatment systems. Some 340 clients will be randomly assigned to one of two different programs. The first will be a previously existing residential therapeutic community program followed by referral to aftercare services with standard coordination and follow up. The second will be a new program that follows the residential therapeutic community program with an additional 6 months of integrated therapeutic community aftercare, offering a broad range of outpatient program interventions, such as case assistance, family/significant other support groups, and a Health and HIV/AIDS Self-Management Group.

SM51831

Congressional District: NY-08

**FY 99 Funding:** \$488,936

Project Period: 9/1/95 - 8/31/00

This project, which is being carried out in Worcester, Massachusetts, is designed to determine the relative effectiveness of two models of community rehabilitation with strong vocational components, e.g. the Program of Assertive Community Treatment and the Clubhouse model. This is the first experimental comparison of the Clubhouse model with the model of Program of Assertive Community Treatment (PACT); both models have been extensively used throughout the US and internationally. Extensive involvement of mental health consumers is included in the design. Eligible participants in each site, who have never participated in either model, are being randomly assigned to either a Program of Assertive Community Treatment or the Clubhouse model. Each of the programs in the study will be provided with staff training in each of their respective models. An extensive battery of clinical, social, and employment outcome measures will be used.

Project Period: 9/30/99 - 9/29/01

The Harlem Family Strengthening Initiative will: identify strategies and effective family strengthening models; adapt selected strategies and models for implementation with an urban multicultural African American Community; and conduct field study graduating 30 children and families. The goal of this project is to: increase the capacity of local communities in Harlem to deliver best practices in effective parenting and family programs in order to reduce or prevent substance abuse; document the decision-making processes for the selection and testing of effective interventions in community settings; and to determine the impact of the interventions on the target.

*AIDS Service Center of Lower Manhattan*

New York, NY

Targeted Capacity Expansion for Substance Abuse Prevention  
and HIV/AIDS

SP08877

Congressional District: NY-08

**FY 99 Funding:** \$249,000

Project Period: 9/30/99 - 9/29/02

ASC will develop and implement a Women's Integrated Substance Use/HIV Prevention Program targeting African-American and Latina women in Manhattan, by providing culturally, ethnically and linguistically appropriate prevention interventions in English and Spanish. This program incorporates a continuum of peer-based substance use and HIV prevention interventions, based on Prochaska's Transtheoretical Model of Behavior Change, and is designed to address substance use and abuse, HIV/AIDS, and women's related life experiences. Each activity is a group intervention, designed to facilitate supportive networks for women that help to reduce the isolation and shame women often feel, as a result of traumatic life experiences, such as childhood sexual abuse, rape, domestic violence, and stress-related mental illnesses such as anxiety and depression.

**FY 99 Funding:** \$353,033

Project Period: 9/30/99 - 9/29/02

Harlem United will create a Family Focused HIV/AIDS Prevention program to enhance its capacity to deliver comprehensive HIV/AIDS and substance abuse prevention services to African American women and their children. This intervention seeks to engage women and their children using a three-tier program that addresses the needs of the mother, adolescents, and children in the family. Harlem United has identified the gaps in services for women living with HIV/AIDS and/or substance abuse issues and their children. Grounded in an evidence based family-centered curriculum, the Family Focused HIV/AIDS Prevention Program will provide a series of workshops designed to reduce risky sexual and substance abuse behaviors in adolescents and their mothers, while an after-school component will address the educational, behavioral, and self-esteem needs of pre-adolescent children in these families. The focus and goal of all components of the program is to break the cycle of HIV and substance abuse risks documented in this population.

Targeted Capacity Expansion for Substance Abuse Prevention  
and HIV/AIDS

SP08889

Congressional District: NY-10

**FY 99 Funding:** \$249,000

Project Period: 9/30/99 - 9/29/02

Housing Works, Inc. will develop a Strengthening Families Program (SFP) designed to address the special prevention needs of homeless and formerly homeless African American, Latina and other racial/ethnic minority women and their children. The primary goal of the SFP will be to reduce the psychosocial/environmental risk factors of the target population and to increase the protective factors essential in preventing child and adolescent HIV-infection, substance use, and juvenile delinquency. It will also link families with a full continuum of vital HIV health care, mental health, drug treatment, and other services. The three-tiered training program will include a parent skills-training component, children's skills-training component, and family skills-training component.

and HIV/AIDS

SP08963

Congressional District: NY-08

**FY 99 Funding:** \$249,000

Project Period: 9/30/99 - 9/29/02

This project is a peer-delivered integrated HIV substance abuse prevention intervention program designed to meet the needs of high risk homeless women in New York City. This group is at extremely high risk for both HIV infection and substance abuse. The purpose of this project is to expand and integrate WIN's current HIV prevention education program with substance abuse prevention using a peer-delivered service model. Clients and former clients of WIN's substance abuse treatment programs will be recruited and trained as peer educators to deliver both HIV and substance abuse prevention messages. The project will target women who are active in treatment at WIN's two substance abuse treatment programs and homeless and substance using women residing in WIN shelters, H.E.L.P., St. John's Place Family Center, and Project Renewal. The Project's long-term goal will be to reduce the incidence of substance abuse and HIV infection in the target population.

*Lesbian and Gay Comm Serv Ctr*

New York, NY

Targeted Capacity Expansion for Substance Abuse Prevention  
and HIV/AIDS

SP08971

Congressional District: NY-08

**FY 99 Funding:** \$249,000

Project Period: 9/30/99 - 9/29/02

The overall goal of this project will be to: a) fully integrate, enhance, evaluate and then disseminate gay-affirmative, culturally relevant, effective substance abuse and HIV/AIDS prevention strategies that are targeted to Lesbian, Gay, Bisexual, and Transgender (LGBT) youth of color and; b) to develop prevention strategies that are targeted at LGBT families of color and LGBT trans-racial families, that will reduce risk for children of LGBT parents and promote development of protective factors in LGBT families. This program will implement and evaluate an innovative series of proposed interventions and will adapt existing strategies to the specific needs of the LGBT communities, will represent a proven best practice model and serve as a significant contribution to the field of substance abuse and HIV prevention for populations that have had little or no access to culturally relevant, gay-affirmative prevention services.

Family Strengthening

SP08781

Congressional District: NY-15

**FY 99 Funding:** \$96,123

Project Period: 9/30/99 - 9/29/01

Inwood Community Services (ICS) will implement a family strengthening intervention model. The target population for this program will be clients from ICS's existing mental health and substance abuse treatment services, together with families, and significant others who from the Dominican Republic and who reside in New York City. Characteristics of the program's pool of participants will guide the selection and adaptation of the intervention. This intervention will include: the age of the targeted child, parents' literacy levels in English and Spanish, family structure, cultural background, and gender and sexual orientation of the family members. The selected intervention will determine which services the project provides, and how often and to which family members, alone or in combination.

Rochester, NY

Targeted Capacity Expansion for Substance Abuse Prevention  
and HIV/AIDS

SP08876

Congressional District: NY-28

**FY 99 Funding:** \$249,000

Project Period: 9/30/99 - 9/29/02

This two-year project is intended to raise awareness of, and prevent, the problems of substance abuse, HIV/AIDS, and sexually transmitted diseases among women and their third, fourth, and fifth grade children in a culturally diverse inner-city population in Rochester, NY. Mothers, health care providers, and community leaders will be involved in planning, implementation, and evaluation of this project. The mothers and children will be taught basic information about the above diseases, and taught various skills that will allow them to refuse drug and high-risk involvement. Mothers will also be taught to reinforce these skills in their children. Peer leaders will be used to help communicate general information about the above diseases, to reinforce refusal skills, and to model abstinence norms.

Project Period: 9/30/98 - 9/29/01

Albany, NY  
TI11629

The New York State Research Foundation for Mental Health Hygiene, Inc. (RFMH) TOPPS II project, in collaboration with the Office of Alcoholism and Substance Abuse Services (OASAS), will continue to develop a State outcomes monitoring system (OMS) that is sustainable, affordable, and that allows continual tracking and reporting on the effectiveness of the State's substance abuse treatment providers. To accomplish this goal, the predictive validity of a set of performance indicators that are currently included in New York's management information system (MIS) will be assessed. If the performance indicators are valid predictors of outcomes, the State will move toward using data currently provided by the MIS to predict outcomes rather than relying on expensive and time consuming long-term outcomes evaluations. Secondly, the State will evaluate whether the assessment instrument that is currently mandated statewide, the Client Admission Report (CAR), is sufficiently comprehensive and sensitive to support case-mix adjustment or whether an alternative instrument is necessary to increase the predictive power of the performance indicators. The Addictions Severity Index (ASI) Lite, a shorter version of the ASI, will be pilot tested and the cost effectiveness of using it in the OMS will be evaluated by determining how much the improved precision in predicting outcomes costs in terms of the additional expense to the State for training and additional time to provider staff to administer it at intake. New York will participate in meetings and workgroups of the Inter-State Steering Committee and common data elements and measures that are selected by this group will be added to the study.
